# Youssef Talaat

Software Engineer & Front-End Developer  
Alexandria, Egypt

## Summary

I'm a front-end developer with a strong passion for building clean, interactive websites and applications. I've worked on many real-world projects — from personal portfolios to small games — where I turned design ideas into working web pages. During my learning journey, I completed the Kalbonyan Elmarsos program (first batch – first trip to learn), where I earned 11 certifications and got my first hands-on, paid learning experience. I also earned 31 certifications from Almdrasa and completed over 20 projects that helped me grow technically and creatively.

You can check out my projects on GitHub and my portfolio to see the results of my work and commitment.

I care about more than just code. I believe soft skills, good communication, and language improvement are just as important as technical skills. I'm always learning and building, day by day, to grow into a strong front-end developer who writes clean code and builds meaningful user experiences. Every project I work on pushes me forward — and I'm just getting started.

## Experience

المدرسة - Almdrasa

Front-End Developer Trainee

April 2025 - Present (5 months)

Through the Almdrasa platform, I followed a complete front-end learning journey that included 4 major learning tracks, covering both core programming and modern web technologies. The full program consisted of 27+ courses and provided strong practical training in key areas of front-end development:

Python Programming Basics Learning Path

Building Interactive Websites Using HTML and CSS

JavaScript Learning Path - From Scratch to Professionalism (repeated as advanced level)

Modern Front-End Skills including DOM, Events, and Responsive Layouts

This track earned me 31 certifications and helped me complete over 20 hands-on projects, including responsive websites and small games. The learning was focused on real-world skills and modern development practices, helping me build confidence and readiness for real projects.

كالبنيان المرصوص

Full-stack Developer

September 2021 - November 2021 (3 months)

During my internship at Kalbonyan Elmarsos, I gained a solid foundation in web development and programming concepts. I successfully completed the “Become a Programmer: Foundations & HTML/CSS” course (24h 27m), which helped me understand the core building blocks of websites.

The internship provided access to high-quality, full-track courses designed to build real-world skills. These included:

The Modern JavaScript Bootcamp (29h 39m)

The Complete React Developer Course (with Hooks and Redux) (39h 11m)

The Complete Node.js Developer Course (35h 3m)

AWS Certified Cloud Practitioner (13h 0m)

AWS Certified Solutions Architect Associate (43h 0m)

Serverless Stack Project

While I haven’t completed all of these courses yet, I’m actively studying and applying what I learn through personal projects and hands-on practice. This internship gave me the structure and motivation to keep growing in my career as a front-end developer.
